

Patent Application of Wayne O. Hadland for "Support Fixture  
for Food Plate and Beverage Container" continued

ABSTRACT: A disposable fixture for supporting a beverage container and for supporting a food plate having a central hole approximately three inches in diameter, suitable for holding with one hand. In the preferred embodiment the fixture is made entirely of corrugated fiberboard (aka corrugated cardboard) and, except for two rubber bands, requires no fasteners (e.g., glue, tape, or staples). The fixture can support several kinds of beverage containers without needing modifications or additional parts. All unassembled parts can be laid flat so as to take up minimal storage space. The fixture weighs approximately two ounces.
